

Distribute proportional amounts of product to multiple locations without interrupting the main product supply.

FastBack

Revolution!

Proportional Distribution Gate

- Consistent proportional product flow
- Improves weigher efficiency, reduces product giveaway
- No product leaks or breakage
- Ends product sifting and cross contamination
- Easy cleaning and changeovers
- Motor driven system uses no pneumatics
- Safe, with no pinch points

Keep your product flowing and distribute proportional amounts to multiple weighers, seasoning applicators and other equipment. Our patented Revolution gate eliminates product breakage, leaks, allergen risks and inconsistent product flow problems that are common with slide gates. Revolution's rotating drum closes completely and requires no product containment covers. For changeovers and cleaning, simply rotate the gate, wipe and run without removing parts. No pinch points, no pneumatics, no hassles. Revolution is simply the most intelligent product distribution system available!

Revolution is only available on FastBack conveyors.
